INTRODUCTION

The companies are based in Western Australia and provide a vast range of services to the resource industries throughout the Pilbara. The SX5 Group is 51% Aboriginal owned and has AS/NZS ISO 9001, AS/NZS 4801 and AS/NZS ISO 14001 Certification. With a corporate office in Perth and the Pilbara office situated in Karratha, the Group is well situated to provide exemplary service to the Pilbara region as well as service our clients in Western Australia.

The Group consists of:

- CIVIL ROAD AND RAIL SX5 PTY LTD
- PORTACCOMM SX5 BUILDING SYSTEMS PTY LTD
- PORTACRETE SX5 PTY LTD

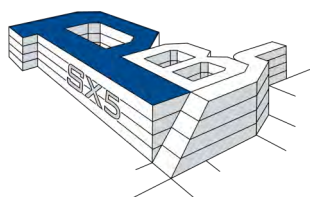

The core values encompass advancing the opportunities and skills of its employees, staff and local community. As such, we have built our own training facilities in Karratha and developed one of the only indigenous / youth training programs within the construction and resource sectors Australia wide. This has advanced the company's reputation as an employer of indigenous personnel with current workforce content at 35%. This program is part of the company's broader commitment to the continued training and advancement of its entire work force through progressive training initiatives and the development and use of its in house training facilities.

The company's dedication to the quality of its service to clients and level of expertise for its employees has placed the company in a lead position for future growth and success. As an industry leader in fostering the training and development of its human resources the group continually focuses on key commitments such as:

- Fostering cooperation and consultation, and to provide for, the participation of employees in the formulation and implementation of health, safety and environment standards.
- Securing the services of professional personnel for all key positions within the organisation.
- Seeking to continually improve management capabilities and the quality of decision making.
- Developing and maintaining its Indigenous training program to ensure continued industry leadership in the field.
- Promoting a culture where all employees treat each other with dignity and, as a priority, respect each other's health, safety, and welfare.

As a result of this commitment, the group continually strives for improvement to ensure only the highest levels of quality and service are maintained and delivered to our valued clients.

“Companies are pre-qualified with Rio Tinto, BHP, Main Roads, Water Corporation and Woodside.”

PORTACCOMM SX5 | BUILDING SYSTEMS PTY-LTD

CIVIL | ROAD & RAIL SX5 PTY-LTD

POWERED BY OUR VALUES

The group bases its organisation's approach on a set of values that define the way we work.

As the business evolves and grows, it's the company's values that firmly ground our culture and make us unique.

These values are central to the business and guide us in the way we work with our clients, providers and each other. They are:

HEALTH AND SAFETY FIRST

Safety is our number one priority; we maintain a strong policy for the safety and general well-being of all employees, ensuring that an established Health and Safety Management System applies.

DUTY OF CARE

The Companies actively recognise its responsibility to its employees, clients and stakeholders. We ensure that all levels of employees are supported and benefit from our open channels of communication. We value all our people as we understand that the respect of our employees and clients will benefit to strengthen the company.

TEAMWORK

The group offers support to all of its employees and ensures all people are working together to achieve a common goal. We treat all people with dignity and respect, inside and outside the company.

COMMUNITY AND TRAINING

We endeavour to provide employees with the resources, training, information and to maintain a no injuries environment. We actively support our local community with training and employment opportunities.

ENVIRONMENTAL COMMITMENT

As we are becoming increasingly aware of the fragility of the Australian landscapes and ecosystems, it is important to ensure that all works have as little impact on the natural environment as possible. This will ensure that the beauty and diversity of the plants, animals and land will be there to enjoy for generations to come.

Those who have a strong connection to the land can be satisfied with the commitments we mutually uphold. We maintain a high degree of respect for the natural environment and this is reflected in our Construction Environmental Management plan and appreciated by the local communities.

RESOURCES

CIVIL INFRASTRUCTURE WORKS

Through our civil company within we have built a respectable reputation within the resource industry, state and local Governments by providing civil contracting and plant hire for road works and road maintenance, bulk earthworks, rail construction, culvert works, construction of landing strips and landscaping and environmental rehabilitation.

MINING INFRASTRUCTURE AND CONSTRUCTION

The group is able to offer the entire gambit of engineering and construction services including civil and construction contracting, fabrication and installation of portable and in-situ buildings, concreting, maintenance services, design services and civil engineering services.

PORTABLE BUILDING DESIGN AND FABRICATION

At the Karratha office site, the company has a \$7.5m manufacturing complex capable of producing state of the art portable buildings to service the W.A. resource industry. Using approved materials we produce our own products for use in the construction of our portable buildings.

PORTABLE BUILDING HIRE

The Group is committed to being able to provide 'total service' to our valued clients, as a result we have ensured that a liberal hire fleet of Buildings is produced and maintained through our manufacturing resources. No matter what the requirements of our clients may be, we can assure that there is a building to suit with terms and conditions to fit the budget.

CONCRETE BATCHING AND CRUSHING

Portacrete SX5 provides mobile on site concrete batching services with the latest up to date Sami batching equipment from Italy. With this technology, Portacrete SX5 can now produce concrete at all strengths and types from a 100kg mix to 80m³ per hour continuously with an accuracy to 99.9%.

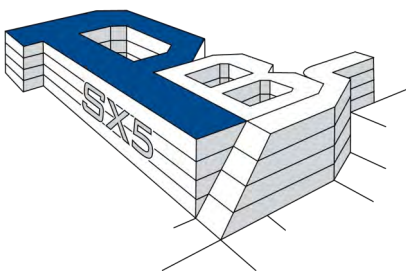

Portacrete SX5 has batching equipment for culver stabilization that allows continual batch and pour of concrete at a rate of 60m³ per hour. Along with the state of the art batching equipment we have all terrain agitators that can either self load or be fed by the main plant. The onsite batching equipment allows us to come in, set up and be pouring concrete the same day and be gone the next, no more expensive set up cost and mobilization costs.

PORTACCOMM SX5 BUILDING SYSTEMS

Designs, manufactures and installs high quality buildings which are built to withstand the harsh realities of the Pilbara climate including the extreme heat and cyclonic wind conditions of the region.

Here, innovative thinking combined with proven capabilities are used to create world class, environmentally sustainable facilities that meet the needs of our clients.

Portacomm SX5 Building Systems has stamped its self as a leading Aboriginal Contracting Company in the Pilbara specialising in building construction and site installations of mining camps and central facilities.

Our buildings are constructed from the most stringent specifications which, in time, will be the bench mark for the industry. In addition, these buildings were engineered and tested for a period of twelve months prior to being initially marketed to our clients.

Our priority is to produce buildings that are able to cope with the harsh conditions in the Pilbara, mainly extreme heat and cyclones. Portacomm SX5 delivers 6-star sustainable energy ratings.

Portacomm SX5 have built and installed kitchen and dining facilities that become the cyclone refuge shelter for the mine sites when needed.

We provide a full range of project management, design, construction and general fit out services to the mining and domestic sector.

The frames and cladding are manufactured at our Perth and Karratha facilities using state of the art computer guided roll form technology which, together with our superior anchoring systems produce what we believe to be the best buildings available. The frames and cladding are then assembled by our specialist teams.

Quality and safety is our commitment through out the processes, we have engineered a building anchoring system for steel skids, utilising multiple anchors being set down in concrete up to 2.4 metres in depth. This engineered and certified system is far superior to conventional pre-cast fixings.

“Safety First, Value for Money & Nil Dispute”

Ralph Keller, General Manager

PORTACRETE SX5

An Aboriginal Contracting Company supplying remote jobs with high quality concrete from stabilised materials to high strength structural concrete.

“The Pilbara’s Mobile Concrete Batching Specialists”

Portacrete SX5 started in early 2010 to supply remote jobs with high quality concrete from stabilised materials to high strength structural concrete for structural bridges.

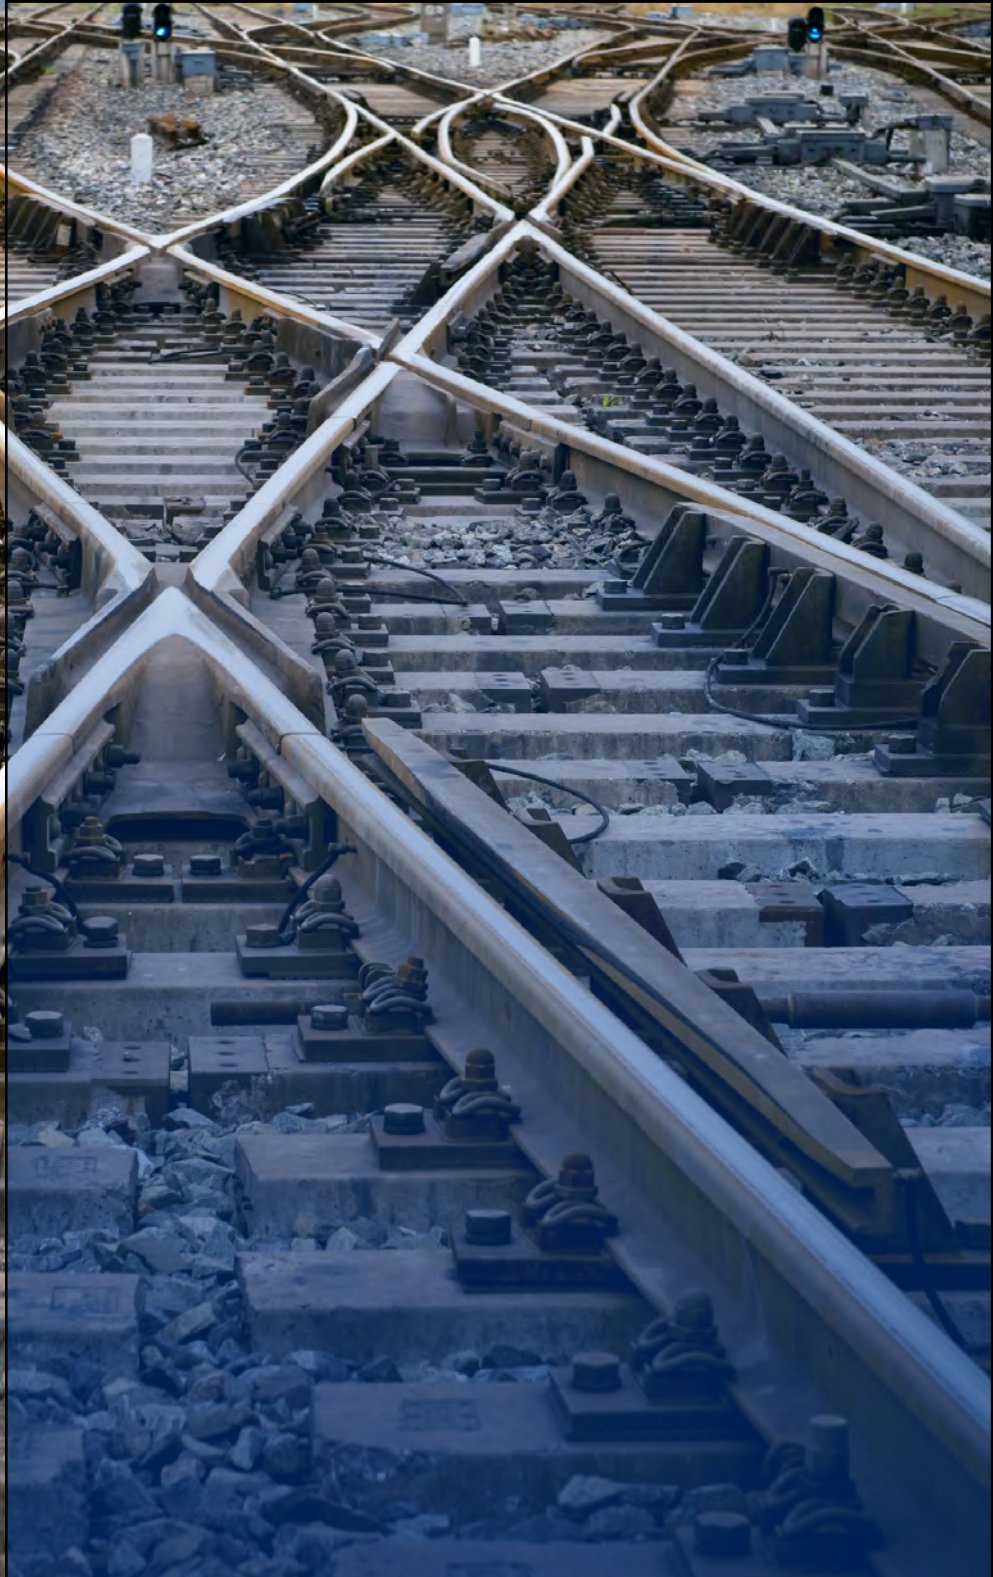

Portacrete SX5 provides mobile on site concrete batching services with the latest up to date Sami batching equipment from Italy. Portacrete can now produce concrete of all strengths and types from a 100kg mix to 60m³ per hour continuously with accuracy to 99.9%.

Portacrete SX5 has batching equipment for culvert stabilisation that allows continuous batching and pouring of concrete at a rate of 60m³ per hour. Along with state of the art batching equipment we have all terrain agitators that can either self load or be fed by the main plant. The onsite batching equipment allows us to come in, set up, be pouring concrete the same day and be gone the next. No more expensive set up cost and mobilisation costs.

The company's products include but are not limited to:

- Stabilised materials
- Concrete from 15MPa blinding to 50MPa high strength concrete
- Concrete suitable for spray & pump mixes
- Concrete added with plasticizer for early strength & fibre for extra durability
- Coloured concrete
- Precast concrete elements from retaining walls, tie downs and precast footings

Due to the extreme realities of the Pilbara climate, it is necessary to have bigger and stronger structures to withstand the high wind conditions. Portacrete SX5's aim as a company of the Pilbara is to meet these high standards with any product supplied to ensure it is compatible to D Region wind ratings.

CIVIL ROAD AND RAIL SX5

An Aboriginal Contracting Company, Civil Road and Rail **SX5** has stamped it's self as a leading Aboriginal Contracting Company in the Pilbara and undertakes civil earthworks, civil engineering and construction and also specializes in building construction, rail construction and site installations of mining camps and central facilities.

Director, Kenzie Smith, of the Eastern Gurama group, together with Directors, Ralph and Cherie Keller of SX5 Group, form the partnership Civil Road & Rail SX5. This company has earned integrity, trust and strong communication with the majority of the local traditional land owners of the Pilbara region of which Kenzie Smith is a respected senior elder.

It is this commitment that will help us build a future that enhances people's lives, safeguards the local environment and creates opportunities.

We are an exciting company and committed to our employees, colleagues, clients, all aboriginal and non aboriginal people and their communities. We provide training, encourage team participation, employment and business opportunities, alliances, sponsorships, apprenticeships, resources, and business development throughout the region.

Civil Road & Rail SX5 have achieved the respect of the indigenous people with our commitment to their communities. This Company is a dedicated member of the community and has developed a newly completed training centre in Karratha. Through this facility, many aboriginal and non aboriginal people graduate with nationally accredited competencies and the confidence to enter into new employment opportunities.

Civil Road & Rail SX5 own and maintain a modern fleet of earthmoving equipment for mining, road construction and Railway work. Including, but not limited to:

- mobile concrete batching,
- road transport logistics,
- supply of trenching services and equipment and
- general civil and port projects.

CIVIL | ROAD & RAIL SX5 PTY-LTD

CIVIL ROAD AND RAIL SX5

Designs, engineers and constructs Relocatable Solar Lighting Solutions for the mining and construction industries in WA.

Being relatively new to the market, the solar light poles have been received with positive reviews and are increasingly growing in popularity. This has created a great new opportunity for Civil Road and Rail SX5 Pty Ltd as they begin to create more solar power solutions.

Relocatable Solar Lighting & Security Solutions

Since 2010 the Group has designed & manufactured Relocatable Solar Light Poles. These poles were originally developed for projects in remote areas where very little infrastructure was available and are now a quick, affordable lighting solution. By not needing to provide power for the light poles means supplying a smaller generator to the camp and therefore, using less fuel: Cost effective and environmentally friendly.

The light poles are equipped with a Hydraulic Ram Kit on the Light Pole Mast. This means the light poles are now able to be raised and lowered with minimal risk and equipment for quicker, safer, and less costly; maintenance, installation and transport.

With the recent addition of the CCTV integration option, the light poles now double as a Security system. The light poles are now equipped with security cameras which can be accessed via WiFi or 3G internet connection and can be activated by motion detection. The user can interact with the security camera at any time and monitor the venue or yard where the cameras are positioned in real-time. The images can also be downloaded and recorded for future review or use.

Specifications:

- 6 Metres in Height
- CCTV integration
- Up to 5 Days Back-up Power
- Hydraulic Lift Lighting Mast
- D Region Wind Rating
- Solar Panel & Rechargeable Batteries
- Automatic Lighting Cycle
- 30Watt, 50Watt, or 80Watt LED Lighting Head
- Insect Repellent Lighting Heads Available
- 5 Tonne Concrete Footing Block
- Relocatable by Forklift or Crane

The growing popularity of these poles has created a new product and successful side project for Civil Road and Rail SX5 Pty Ltd.

PRIOR WORKS

The Group has been operating in the Western Australia for 25 years including the Pilbara region for 15 years, managing a variety of different projects in remote locations.

PROJECT HISTORY

Cape Lambert Power Station - Miscellaneous Works / Earthworks Rectification and Pond Lining / Rehabilitation Works

Client Rio Tinto
Location Cape Lambert
Duration / Year 5 Years - Ongoing - 2013 - 2018

Boolgeeda Rehabilitation Project

Client Rio Tinto
Location Boolgeeda
Duration / Year 11 Weeks - 2018

Yandi Oxbow Project - Personnel Facilities

Client Rio Tinto / Calibre
Location Yandi Mine Site
Duration / Year 7 months - 2017

Rail Capacity Enhancement - Miscellaneous Earthworks

Client Rio Tinto
Location Karratha / Cape Lambert
Duration / Year 2.5 Years - 2010 - 2013

Coastal Water Project - Supply Concrete

Client Monadelphous / SCEE
Location Bungaroo - Millstream
Duration / Year 2 Years - 2012 - 2014

Pannawonica Town Refurbishment - Supply Concrete

Client Rio Tinto / Other Contractors
Location Pannawonica
Duration / Year 2 Years - 2010 - 2012

Warrambo Project - North West Coastal Bridge over Mesa A - Warrambo Haul Road & a second bridge within Mesa A

Client Structural Systems
Location Pannawonica
Duration / Year 5 Months - 2012

Supply and Install Temporary Facilities

Client Decmil / BHP
Location Warrawandu
Duration / Year 1 months - 2012

Kurra Village - Accommodation Village Refurbishments

Client BHP
Location Kurra Village
Duration / Year 2 Months - 2011

Port Control Room and Sample Building - Design, Manufacture, Supply and Installation

Client Cimeco
Location Cape Preston
Duration / Year 6 Months - 2012

PROJECT HISTORY

Design, Manufacture, Supply and Installation of VTS Building

Client Dampier Port Authority
Location Dampier
Duration / Year 6 months - 2014

Design, Manufacture, Supply and Installation of Gate House

Client Dampier Port Authority
Location Dampier
Duration / Year 3 Months - 2012

Design, Manufacture, Supply and Installation of Office Complex

Client Dampier Port Authority
Location Dampier
Duration / Year 3 Months - 2011

Design, Manufacture, Supply and Installation of Multi-Room Office Complex

Client Dampier Port Authority
Location Dampier
Duration / Year 5 Months - 2012

Design, Manufacture, Supply and Installation of Office Complex

Client Dampier Port Authority
Location Dampier
Duration / Year 4 Months - 2008

PROJECT HISTORY

Jigalong Community Workshop - Design, Manufacture, Supply and Installation

Client BHP
Location Jigalong
Duration / Year 5 Months - 2011

Weelumurra Ancillary Buildings - Design, Manufacture, Supply and Installation

Client Rio Tinto
Location Weelumurra
Duration / Year 1 Month - 2012

Design, Manufacture, Supply and Installation of Office Complex

Client Karratha Flying Services
Location Karratha
Duration / Year 6 Months - 2011

Manufacture and install of a Kitchen/Diner and associated buildings & Camp

Client BHP
Location Porthaven
Duration / Year 4 Months - 2010

Wandoo Housing Project – Design, Manufacture, Supply & Installation of Construction Camp, EPCM Site Offices and Temporary Buildings

Client Rio Tinto
Location Pannawonica
Duration / Year 5 Months - 2010

Design, Manufacture, Supply and Installation of Office Complex

Client Mermaid Marine
Location Dampier
Duration / Year 3 Months - 2009

Design, Manufacture, Supply and Installation of 50 Accommodation Rooms, Kitchen, laundry and offices

Client Hancock Prospecting
Location Mulga Downs
Duration / Year 5 Months - 2008

Brockman 4 Project Pioneering and Miscellaneous Earthworks contracts

Client Rio Tinto
Location Brockman 4
Duration / Year 2.5 Years - 2009

7 Mile Power Station Manufacture and install of EPCM offices

Client Rio Tinto
Location Dampier
Duration / Year 3 Months - 2008

Miscellaneous and Pioneering Earthworks

Client FMG
Location Castle Mine Site, Pilbara
Duration / Year 7 Months - 2008

Design, Manufacture, Supply and Installation of EPCM Offices

Client Rio Tinto
Location Cape Lambert
Duration / Year 6 Months - 2008

Design, Manufacture, Supply and Installation of Brockman 4 EPCM Office

Client Rio Tinto
Location Brockman 4
Duration / Year 4 Months - 2009

Design, Manufacture, Supply and Installation of EPCM Offices and Miscellaneous Earthworks

Client Rio Tinto
Location Dove Siding
Duration / Year 5 Months - 2009

Design, Manufacture, Supply and Installation of 160 Accommodation Rooms

Client	Rio Tinto
Location	Brockman 2
Duration / Year	4 Months - 2008

Miscellaneous Earthworks for Tunkawanna to Rosella Rail Duplication

Client	Rio Tinto
Location	Tunkawanna
Duration / Year	1.5 Years - 2005

Installation of Office Complex and Associated buildings

Client	Burrup Fertilisers / Fleetwood
Location	Karratha
Duration / Year	5 Months - 2006

Installation of 800 Man Accommodation Village

Client	Fleetwood
Location	Searipple Village, Karratha
Duration / Year	8 Months - 2005

Installation of 1500 Man Accommodation Village and central services

Client	BHP
Location	Ravensthorpe
Duration / Year	8 Months - 2005

Installation of 200 Man Accommodation Village and central services

Client	Nifty Copper Mine
Location	Nifty Copper Mine
Duration / Year	6 Months - 2004

Northam Bypass Project, Base course construction approx. 400,00 m² using laser guidance system

Client	BGC / MAIN ROADS
Location	Northam
Duration / Year	12 Months

Earthworks - Ellendale Highway reconstruction of 18kms

Client	BRIETY / MAIN ROADS
Location	Kimberly's
Duration / Year	8 Months

Pitching in for care centre's shade

The children of Roebourne Yaandina childcare centre can now play outside thanks to Portacomm, which built them a cyclone-proof shade area.

Yaandina chief executive Veronica Rodenburg said the centre previously had shade sails but they did not provide adequate shade and were not cyclone-proof.

Ms Rodenburg said the centre had applied for funding for shade that fitted state legislation requirements and had asked Rio Tinto for a helping hand.

Rio worked with Portacomm to make it happen.

"Portacomm are fantastic community people and a great corporate partner," she said.

"We asked them for a little shade shed and look what we got."

The centre is awaiting a play fort and sandpit, which will complete the outdoor play area in the new year.

Yaandina child care centre accommodates 20 children up to the age of five and focuses on early learning skills.

Pilbara companies take out prestigious awards

CHRIS LEES

TWO Pilbara-based businesses won awards in the GWN7 WA Regional Small Business Awards.

Site Pics won the first award of the night for Best Home Based Business.

Owner Margaret Bertling was surprised and delighted at the result. "It was just an unbelievable honour, it was just amazing," she said.

"You hear the profiles and then I heard my business (announced as the winner) and when someone else says it, it just didn't seem real especially in front of all those people, it was just amazing."

Site Pics is a Karratha-based company and specialises in industrial photography for many of the resources companies in the

region. Ms Bertling said a lot of work had gone into establishing the business.

"I've worked seven days a week, I've done little tiny jobs, I've done big jobs and I've driven for thousands of kilometres... and I've had a huge learning curve, so it has been relentless," she said.

Ms Bertling said the calibre of businesses in the finals was so diverse.

"It just showed me that untapped resource, that there are so many other businesses just waiting to be born," she said.

"You work all your life and then you reach a point where you can do something you really love and I'm really lucky that I not only do something that I really love but people trust me to do that."

Portacrete SX5, which has been highly successful this year,

won Best Aboriginal Business at the awards.

The award capped off a great year for the concreting company after winning Business of the Year and the Indigenous Business Award at the Karratha and Districts Chamber of Commerce and Industry's Business Excellence Awards earlier this year. Small Business Minister Simon O'Brien said all the winners should be very proud of themselves.

"The nominated and successful businesses are the 'best of the best' small and medium-sized businesses in regional WA and are a great example of the creativity and innovation of the small business sector in this State," he said.
